Web Developer

I am a Web Developer passionate about creating resilient, scalable, and maintainable software, and I am excited to improve the users' experiences, both internal and external. My interest in web development began in 2015 when I began my studies as a Software Engineer. I am meticulous and pay attention to detail, especially when working with design specifications. I am knowledgeable about a wide range of web and internet technologies. Currently, I am looking for an opportunity to be part of a company that allows me to apply everything I have learned so far and continue growing personally and professionally to achieve the greatest possible results.

Work Experience

UEB Network Applications, Cuba — Web Developer

December 2021 – October 2023

- Wrote modular, efficient, and clean code for front-end and back-end components.
- Implemented responsive and user-friendly front-end designs.
- Maintained databases and performed database SQL queries for data retrieval and manipulation.
- Collaborated closely with the development team using GitLab and GitHub.
- Collaborated with the development team to design, develop, and maintain web applications.
- Studied the line of business of several clients and proposed new solutions to problems.
- Participated in code reviews and provided constructive feedback.
- Fixed and debugged issues to ensure optimal performance and user experience.

Technologies:

HTML5 / CSS3 / JavaScript / Symfony / PHP / PostgreSQL / GitLab / ReactJS / NodeJS / ExpressJS / MongoDB / GitHub / Scrum
